Grant Thornton Bharat LLP is one of the world's leading organisations of independent assurance, tax and advisory firms. With more than 53,000 GT people across over 135 countries, they are focused on making a difference to clients, colleagues and the communities in which they live and work.

About FinTech Domain

India's FinTech market has raked up to **USD 10 billion** as an investment in the past few years and is expected to grow at a trajectory of **USD 150-160 billion** valuation. This has led to the growth of multiple FinTech job opportunities, resulting in high demand for professionals with the right set of skills.

Why do the FinTech Program with RISE?

FinTech is a broad term to describe financial services and processes with algorithms, automation, and computer technology. The shift towards technology advancement has led to a rise in demand for professionals and graduates with the right skillset in this field.

RISE, in collaboration with Grant Thornton Bharat LLP, prepares you with insights and in-depth understanding of technology-backed financial services that will enable you to:

Understand how payment solutions are developed and deployed

Follow how 'buy now pay later' works as a part of the lending technology

Know how data analytics plays a critical role in the modern banking sector

Use programming languages and databases in the FinTech space

Develop UI/UX for new age interfaces

Program Highlights

Interactive Learning

At RISE, we employ experiential learning techniques for our students that will allow them to apply their knowledge to real-life professional scenarios. This approach will help students to tackle the most pressing problems that businesses face.

What roles are FinTech firms looking for?

Exciting roles driving a FinTech firm

Product Manager

A product manager forges strategic partnerships with financial institutions and merchants to create solutions with many use cases and boost adoption.

Product Engineers

FinTechs with limited resources adopt an agile product development approach. Product engineer professionals implement products quickly along with open stack application developers to roll out products in short sprints.

Data Scientist

FinTechs typically look at unstructured data as well to reach the underserved. Data scientists uncover value from data collected through multiple sources to customise product offerings.

Content Writers & Social Media

The team typically consists of content writers who publish through leadership and a social media marketing team to enhance the visibility of the FinTech firm.

UI/UX Designers

A UI/UX and graphic designer develop hassle-free workflows, typically for mobile-only solutions, for a great customer experience.

Cloud Management

With FinTechs adopting an apex approach for infrastructure investments, cloud management professionals manage the entire ecosystem, including governance and cyber security over a cloud.

Sales & Marketing

Transaction throughput is an essential metric for FinTechs; the job of the sales and marketing team is to target the right segments and acquire customers primarily through digital-only channels.
